[Twitch Upon a Star](#) Herbie J. Pilato 2012-11-05 Based on author Herbie J Pilato's exclusive interviews with Elizabeth Montgomery prior to her death in 1995, Twitch Upon a Star includes insider material and commentary from several individuals associated with her remarkable life and career before, during, and after Bewitched, including her classic feature films The Court Martial of Billy Mitchell (1955), Who's Been Sleeping In My Bed? (1963), and Johnny Cool (1963). Two of Montgomery's many popular TV movies, A Case of Rape (which remains one of the highest-rated TV-movies of all time) and The Legend of Lizzie Borden (which will soon be remade as a feature film), were groundbreaking and remain classics. But Twitch Upon a Star also goes behind the scenes to explore Montgomery's political activism, including her early advocacy for AIDS sufferers and the peace movement; her support for all minorities, including the gay community and the disabled; and her controversial participation as narrator

of the 1988 feature film documentary *Cover-Up* and its 1991 Oscar-winning sequel, *The Panama Deception* (both of which chronicled the Iran/Contra scandal of the 1980s). The book also explores Montgomery's tumultuous relationships with her father, screen legend Robert Montgomery (she was a liberal; he was a staunch conservative), and her four husbands (including actor Gig Young, who later died in a murder/suicide). Through it all—and to family and friends such as fellow performers Ronny Cox, Sally Kemp, and Florence Henderson—she was just Lizzie: down-to-earth and unaffected, just like Samantha, the "witch-with-a-twitch" Stephens, her most famous role.

Almost Human: Making Robots Think Lee Gutkind 2010-09-06 A remarkable, intense portrait of the robotic subculture and the challenging quest for robot autonomy. The high bay at the Robotics Institute at Carnegie Mellon University is alive and hyper night and day with the likes of Hyperion, which traversed the Antarctic, and Zoe, the world's first robot scientist, now back home. Robot Segways learn to play soccer, while other robots go on treasure hunts or are destined for hospitals and museums. Dozens of cavorting mechanical creatures, along with tangles of wire, tools, and computer innards are scattered haphazardly. All of these zipping and zooming gizmos are controlled by disheveled young men sitting on the floor, folding chairs, or tool cases, or huddled over laptops squinting into displays with manic intensity. Award-winning author Lee Gutkind immersed himself in this frenzied subculture, following these young roboticists and their bold conceptual machines from Pittsburgh to NASA and to the most barren and arid desert on earth. He makes intelligible their discoveries and stumbling points in this lively behind-the-scenes work.

Shadow of Perception Kristine Mason 2013-07-23 What happens when negligent plastic surgeons get a taste of their own medicine...? Chicago investigative reporter, Eden Risk, receives an unmarked envelope containing a postcard ordering her to watch the enclosed DVD...or someone else dies. No police. After Eden watches the DVD, a gruesome, horrifying surgery, she turns to the private criminal investigation agency, CORE, for help. Only she hadn't expected that help to come with a catch. Her former lover, Hudson Patterson, has been assigned to the case. Hudson would rather have another CORE agent handle the investigation. Two years ago, he'd screwed things up with Eden...bad. And as more DVDs arrive, Eden and Hudson find themselves not only knee-deep in a twisted investigation, but forced to deal with their past, and the love they'd tried to deny.

The God of Shattered Glass Frank Rogers Jr. 2011-01-01 Where does one find hope in the midst of profound suffering? Tony Backman aches to know. A blues-harmonica-playing child psychologist at a residential

treatment center in Santa Rosa, California, Tony specializes in narrative therapy. His story-based technique empowers abused teenagers to reimagine their lives through myths and folktales and so restore their vitality. Such vitality, however, eludes Tony in his own life. Mired in depression, he longs for his fractured family and fends off childhood flashbacks too painful to face. Tony's mentor recommends classical underworld myths as a roadmap for the spiritual journey toward healing and hope, but Tony is too drained for the undertaking. Until Carey Foster enters his life. Carey is a golden-voiced eleven-year-old choral soloist at a local Catholic boys' home. Brought to Tony's treatment center with his wrists sliced, Carey cowers mutely with his secrets in the center's locked ward, a flicking middle finger his only beacon. Carey's healing depends on Tony's ability to navigate the labyrinth of deception and cryptic self-disclosure that conceals the soul's darkest secrets. It also depends upon Tony's willingness to navigate the labyrinth of love and disappointment lodged in his own soul. At once a psychological study of how trauma is healed; a hero's journey through the underworld of abuse, betrayal, and shattered faith; and a theological thriller in search of a credible and sustaining Sacred in the midst of unspeakable suffering, *The God of Shattered Glass* reveals that stories do indeed heal, and that the way to God is not up, but down.

Glamour, Gidgets, and the Girl Next Door Herbie J. Pilato 2014-09-09 *Glamour, Gidgets, and the Girl Next Door* is the latest creation from entertainment biographer and pop culture consultant Herbie J. Pilato. Based on exclusive celebrity interviews, this book runs the gamut of female television legends, from Donna Douglas (who played Elly May Clampett on *The Beverly Hillbillies*) to the stars of the original *Charlie's Angels*. According to Pilato, "There are so many charismatic women who have made their 'beauty-mark' in television. I wanted to celebrate their contributions, not only with regard to aesthetic appeal but to honor the intelligence, individual wit, and unique talent and style that each of them have contributed to television—and how that great medium in particular was utilized to introduce and showcase so many amazing and wonderful women to the world." Suffice it to say, for exclusive and key information on TV's top leading ladies who shattered expectations and paved the way for successive generations, this book is the number one resource and go-to guide.

Using a patient, tutorial-like approach, the book shows beginning and intermediate photographers not only how to accomplish things with the RX100 II, but when and why to use the camera's many features. The book provides full details of the camera's numerous shooting modes as well as its many menu options for shooting, playback, setup, and special effects. The book includes full coverage of the new features of the RX100 II, including the use of the camera's built-in capability to transfer images and videos over a wireless network and to allow the camera to be controlled remotely by a smartphone or tablet. With this book, author Alexander White provides users of the RX100 VI with a guide to all aspects of the camera's operation. Using a tutorial-like approach, the book shows beginning and intermediate photographers how to take still images and record video with the RX100 VI, and explains when and why to use the camera's many features. The book provides details about the camera's automatic and advanced shooting modes, including burst shooting at rates as fast as 24 frames per second, as well as its numerous menu options for shooting, playback, and setup. The book includes information about using Wi-Fi and Bluetooth connections for image transfer, remote control, and adding location information to images. The book has more than 500 color photographs or illustrations that help explain the camera's menus, shooting screens, and

features. These images include examples of photographs taken using the RX100 VI's Scene mode, with settings optimized for subjects such as landscapes, sunsets, portraits, low-light, and action shots; and the Creative Style and Picture Effect menu options, with settings that alter the appearance of images. The book also provides introductions to topics such as street photography, astrophotography, and digiscoping, with photographic examples. The book includes a full discussion of the video features of the RX100 VI, which can shoot HD and 4K (ultra-HD) movies, and which offers manual control of exposure and focus during movie recording. The book explains the camera's numerous features that are useful for professional-level videography, including Picture Profiles that allow adjustment of settings such as gamma curve, black level, knee, and detail. The book provides detailed information about recording 4K video to an external video recorder using the "clean" video output from the camera's HDMI port. In three appendices, the book discusses accessories for the RX100 VI, including cases, power sources, grips, remote controls, and filter adapters, and includes a list of websites and other resources for further information. The book includes an appendix with "quick tips" on

how to take advantage of the camera's features in the most efficient ways possible. This guide to the RX100 VI includes a detailed index, so the reader can quickly find needed information about any particular feature or aspect of the camera.
