## **Entrepreneurship Education at Universities**

Christine K. Volkmann  
2017-06-15 This volume discusses entrepreneurship education in Europe on the basis of in-depth case studies of related activities at twenty higher education institutions. Based on a model of entrepreneurship education, the analysis addresses curricular and

extra-curricular teaching, as well as the institutional and stakeholder context of delivering entrepreneurship education within higher educational institutions. The book offers both insightful entrepreneurship teaching practices and a discussion of potential organizational drivers and barriers. Accordingly, it provides a valuable resource for researchers, instructors, and

managers of entrepreneurship education alike.

### **The Moment of Speech**

Annie Morrison 2021-11-18

Annie Morrison, creator of the Morrison Bone Prop, abandons the notion that language and thought are mainly processed in the left cerebral hemisphere, and coaches the actor to speak from the heart. Through this method, words acquire physical properties, such as weight, texture, colour and kinetic force. Think about Martin Luther King, Mao Zedong or Malala Yousafzai; potent speech impacts external events. And internally, it forms and shapes the world of the speaker. Seeing articulation as a purely mechanical skill is detrimental to an actor's process: it is crucial to understand what language is doing on a biological level. This workbook is invaluable for actors, both professional and in training, and also for voice and speech teachers. *Error: Glitch, Noise, and Jam*

*in New Media Cultures* Mark Nunes 2011-01-01 Divided into three sections, *Error* brings together established critics and emerging voices to offer a significant contribution to the field of new media studies. In the first section, "Hack," contributors explore the ways in which errors, glitches, and failure provide opportunities for critical and aesthetic intervention within new media practices. In the second section, "Game," they examine how errors allow for intentional and accidental co-opting of rules and protocols toward unintended ends. The final section, "Jam," considers the role of error as both an inherent "counterstrategy" and a mode of tactical resistance within a network society. By offering a timely and novel exploration into the ways in which error and noise "slip through" in systems dominated by principles of efficiency and control, this collection provides a unique take on

the ways in which information theory and new media technologies inform cultural practice.

### **Egyptology in the Present**

Carolyn Graves-Brown 2015-06-01 This volume builds bridges between usually-separate social groups, between different methodologies and even between disciplines. It is the result of an innovative conference held at Swansea University in 2010, which brought together leading craftspeople and academics to explore the all-too-often opposed practices of experimental and experiential archaeology. The focus is upon Egyptology, but the volume has a wider importance. The experimental method is privileged in academic institutions and thus perhaps is subject to clear definitions. It tends to be associated with the scientific and technological. In opposition, the experiential is more rarely defined and is usually associated with

schoolchildren, museums and heritage centres; it is often criticised for being unscientific. The introductory chapter of this volume examines the development of these traditionally-assumed differences, giving for the first time a critical and careful definition of the experiential in relation to the experimental. The two are seen as points on a continuum with much common ground. This claim is borne out by succeeding chapters, which cover such topics as textiles, woodworking and stoneworking. And Salima Ikram, Professor of Egyptology at the American University in Cairo, here demonstrates remarkably that our understanding of the classic Egyptian funerary practice of mummification benefits from both 'scientific' experimental and sensual experiential approaches. The volume, however, is important not only for

Egyptology but for archaeological method more generally. The papers illuminate the pioneering of individuals who founded modern archaeological practice. Several papers are truly groundbreaking and deserve to circulate far beyond Egyptology. Thus the archaeologist Marquardt Lund tackles the problem of understanding the earliest known depictions of flint knife manufacture, those from an Egyptian tomb dated around 1900 BC. He shows the importance of thinking outside 'traditional', i.e. modern, knapping practice. Lund's knapping method, guided by the tomb depictions, is surprising but effective, and very different from that presented in manuals of lithic technology or taught in academic institutions.

### **Participants in the International Legal System**

Jean d'Aspremont  
2011-04-20 The international legal system has weathered sweeping

changes over the last decade as new participants have emerged. International law-making and law-enforcement processes have become increasingly multi-layered with unprecedented numbers of non-State actors, including individuals, insurgents, multinational corporations and even terrorist groups, being involved. This growth in the importance of non-State actors at the law-making and law-enforcement levels has generated a lot of new scholarly studies on the topic. However, while it remains uncontested that non-State actors are now playing an important role on the international plane, albeit in very different ways, international legal scholarship has remained riddled by controversy regarding the status of these new actors in international law. This collection features contributions by renowned scholars, each of whom focuses on a particular

theory or tradition of international law, a region, an institutional regime or a particular subject-matter, and considers how that perspective impacts on our understanding of the role and status of non-State actors. The book takes a critical approach as it seeks to gauge the extent to which each conception and understanding of international law is instrumental in the perception of non-State actors. In doing so the volume provides a wide panorama of all the contemporary legal issues arising in connection with the growing role of non-state actors in international-law making and international law-enforcement processes.

Advancements in the Philosophy of Design Pieter E. Vermaas 2018-03-02 This volume presents 25 essays on the philosophy of design. With contributions originating from philosophy and design research, and

from product design to architecture, it gives a rich spectrum of state of the art research and brings together studies on philosophical topics in which design plays a key role and design research to which philosophy contributes. Coverage zooms in on specific and more well-known design disciplines but also includes less-studied disciplines, such as graphic design, interior architecture and exhibition design. In addition, contributors take up traditional philosophical issues, such as epistemology, politics, phenomenology and philosophy of science. Some essays cover philosophical issues that emerge in design, for instance what design can do in addressing societal problems, while other essays analyze mainstream philosophical issues in which design is part of the argument, as for instance abduction and aesthetics. Readers will discover new research with insightful

analyses of design research, design thinking and the specificity of design. Overall, this comprehensive overview of an emerging topic in philosophy will be of great interest to researchers and students.

*Event Crowdsourcing* Adrian Segar 2019-10-31 Do your conference programs contain sessions you belatedly discover were of little interest or value to most attendees? If so, you're wasting significant stakeholder and attendee time and money - your conference is simply not as good as it could be. Now imagine you knew how to create conference programs that reliably include the sessions and session content attendees actually want and need. How much value would that add to your event, for your attendees, your sponsors, and your bottom line? *Event Crowdsourcing: Creating Meetings People Actually Want and Need* shows you how to create conference

programs and sessions that reliably become what your attendees want and need. The product of over 25 years of participant-driven meeting design experience, *Event Crowdsourcing* clearly explains everything you need to know to successfully integrate effective real-time event crowdsourcing into your programs and sessions. Buy *Event Crowdsourcing* to learn: Why it's so important to create conference programs and sessions that attendees want and need. When to use event crowdsourcing for your meetings and sessions. How to choose the right crowdsourcing approach for your specific needs. *Event Crowdsourcing* contains: A comprehensive compendium of crowdsourcing techniques that will radically improve your meetings. Clear descriptions of the preparation and resources needed to ensure successful implementation. Detailed implementations for each technique, including sample

scripts and options to cover your specific needs. "Adrian Segar's first two books - Conferences That Work and The Power of Participation - have had a resoundingly positive impact on the meeting industry. Now, meeting planners and meeting-goers can further benefit from his newest book: Event Crowdsourcing. This book, both a why-to and a how-to, is jam-packed with proven guidelines, techniques, and suggested scripts to help you design conferences and sessions that are what attendees want and need. It's clearly organized and beautifully written, and I'm happy to recommend it." - Naomi Karten, author of Managing Expectations, Presentation Skills for Technical Professionals, and other books "Actually giving attendees what they want and need instead of what you think they want? What a concept! Adrian Segar has done it again. Event Crowdsourcing is chock-full

of detailed descriptions of low-tech, low-cost solutions that get to the core concerns of meeting-goers from any industry. It's a must read for any meeting planner!" -Brandt Krueger, technical producer, educator, speaker, and event technology consultant "For meeting designers like us, Adrian's work is priceless. He meticulously documents all there is to understand about crowdsourcing, participation, peer-to-peer working, and empowerment of conference audiences. His unique views on these topics make it easy to recognize his training as a former physicist, his facilitation skills, and his belief in what we humans can achieve together." -Eric de Groot and Mike van der Vijver, meeting designers with MindMeeting, and authors of Into the Heart of Meetings "Adrian Segar is a leader in crafting the future of meetings. Event Crowdsourcing is the go-to tactical guide for

planners to allow attendees to create their own meaningful experiences. In a world where everyone is talking about why events need to generate connection and engagement, Adrian has written the how-to guide for you." -Will Curran, founder, Endless Events, and #EventIcons, Event Tech, and Event Brew podcast host

### **Exporting Culture**

Raphaela Henze 2014-01-03  
Is European culture visible enough in the globalized world? Why is culture from this continent often perceived as 'old-fashioned' or even worse as 'out-dated'? Is the export of national cultural products and services - in most European countries subsidized by the taxpayer - no longer relevant, or more relevant than ever before? Is it a huge waste of money, time, and effort or an attempt to create another form of globalization? Culture - in its broadest sense - is often viewed and

accepted in ways that differ completely from those of other internationally traded goods. This might be one of the reasons why so many institutions, foundations and cooperations invest time, power, and money in cultural projects. Is this an exaggerated approach or an intelligent recognition of the genuine values of the 21st century - creativity and cultural sensitivity? These and several other questions concerning the export of culture are addressed by authors from different countries in order to initiate a debate about the role European cultural products and services are able to play globally.

### **The Ambidextrous Organization**

Jens Maier 2015-07-08

100 Things to Do in Houston Before You Die A.J. Mistretta 2015-08-01 If you think you know what Houston is all about, think again. Long recognized as a business capital, today the Bayou City is a destination for those seeking unique culinary and cultural experiences. Driven by the most diverse population in the nation, Houston offers restaurants, festivals, museums and more that celebrate cultures from around the world. Far more than your typical travel itinerary, 100 Things to Do in Houston Before You Die is a definitive guide to the real H-Town experience, from off-the-beaten path attractions like the Orange Show to eclectic eats on Long Point Road. You'll learn about the people and places that have shaped Houston through the decades and create your own experience

in the nation's fourth-largest city. Whether you're visiting Houston for the first time, are a new resident or simply want to reengage with the city, this is the book you need for the journey.

**The Impact of Co-production** Aksel Ersoy 2017-11 Bringing together academics, artists, practitioners and 'community activists', this book explores the possibilities for, and tensions of, social justice work under the contemporary drive for community-orientated 'impact' in the academy. Threading a line between celebratory accounts of institutionalised community engagement, self-professed 'radical' scholarship for social change and critical accounts of the governmentalisation of community, the book makes an original contribution to all three fields of scholarship. Showcasing experimental research and co-production practices taking place in the

UK, Australia, Sweden and Canada and within universities, independent research organisations and internationally prestigious museums and galleries, the book considers what research impact could look like for a wide range of audiences and how universities could engage with different publics in ways that would be relevant and useful, but may not necessarily be easily measurable. Asking hard questions of the current impact agenda, the book offers an insight into emerging routes towards co-production for social justice.

**Disablement** Spandler, Helen 2015-06-16 One of the ways that scholars and policy makers have attempted to address the problems of madness and distress is by applying theories and policies from disability, including the social model of disability. This book brings together

leading scholars and activists from Europe, North America, Australia, and India to explore the challenges to that approach and the relationship among madness, distress, and disability.

ethnomusicological research on globalizing musics in transit. The dual focus on tourism and migration is central to debates on globalization, and their examination—separately or combined—offers a useful lens on many key questions about where globalization is taking us: questions about identity and heritage, commoditization, historical and cultural representation, hybridity, authenticity and ownership, neoliberalism, inequality, diasporization, the relocation of allegiances, and more. Moreover, for the first time, these two key phenomena—tourism and migration—are studied conjointly, as well as interdisciplinary, in order to derive both parallels and contrasts. While taking diverse perspectives in embracing the contemporary musical landscape, the collection offers a range of research methods and theoretical approaches from ethnomusicology,

anthropology, cultural geography, sociology, popular music studies, and media and communication. In so doing, *Musics in Transit* provides a rich exemplification of the ways that all forms of musical culture are becoming transnational under post-global conditions, sustained by both global markets and musics in transit, and to which both tourists and diasporic cosmopolitans make an important contribution.

the complexities of energy policy and the science behind the utilization of energy sources. The multidisciplinary perspective presented in this book is necessary for readers to be able to weigh the advantages and disadvantages of potential energy policies. The book draws on case studies from the global North and South, from countries that are resource poor and resource rich, while providing explanations of the science and politics behind burning fossil fuels, and power created through nuclear energy, solar energy, geothermal energy, wind energy, biofuels and water.

developers, Lauriat delivers fresh ideas and elegant solutions: meaty technical content, presented with exceptional clarity. Among the many topics he covers in unprecedented depth: cleanly implementing JavaScript custom events to reduce coupling and to enhance flexibility; overcoming Ajax's traditional accessibility limitations; reducing network latency through compression and other techniques; and much more. Coverage includes Planning Ajax interfaces for simplicity, clarity, and intuitiveness Creating scalable, maintainable architectures for client-side JavaScript Using the latest tools to profile, validate, and debug client-side code Architecting the server side for security and functionality, while restricting loaded data, objects, and actions to current requests Protecting against the most widespread and significant Ajax security

It complements this by also bringing together different perspectives on the emerging school of legal geography. It explores human-environment interactions and showcases distinct environmental legal geography scholarship. *Legal Geography: Perspectives and Methods* is an innovative book

concerned with a new relational and material way of examining our legal-spatial world. With chapters examining natural resource management, Indigenous knowledge and political ecology scholarship, the text introduces legal geography's modes of analysis and critique. The book explores topics such as Indigenous environmental rights, the impacts of extractive industries, mediation of climate change, food, animal and plant patents, fossil fuels, mining and coastal environments based on empirical, jurisdictional and methodological insights from Australia, New Zealand and the Asia-Pacific to demonstrate how space and place are invoked in legal processes and contestations, and the methods that may be employed to explore these processes and contestations. This book examines the role of legal geographies in the 21st century beyond the simple

"law in action", and it will thus appeal to students of socio-legal studies, human geography, environmental studies, environmental policy, as well as politics and international relations.

*Religion in the Age of Re-Globalization* Roland

Benedikter 2021-12-13 This

book provides a concise introduction into twenty-one trends that are transforming the role of religion and spirituality in "re-globalizing" societies. In referring to processes of "re-globalization", the book draws attention to profound ongoing changes in the patterns and mechanisms of contemporary globalization. Inter- and transdisciplinary in its approach, clearly structured, and easy to read, the book analyzes the impact of religious self-understanding, rhetoric, and practice on five core fields: economics, politics, culture, demography, and technology. In turn, it describes the effects of these five fields on religion

and spirituality themselves. This book represents a broad, encompassing overview of the main transformations that religion is undergoing today. Roland Benedikter combines a “big picture” approach with a keen attention to the details of specific case studies. With its clear and accessible structure and timely examples, this book is ideally suited for students of international relations and religious studies, and will also appeal to researchers engaged in those fields and to interested general readers. The book is also apt to serve as an encompassing basis for contemporary debates in civil society, including both grassroots and expert discussions.

*Failed* Mark Weisbrot  
2015-09-01 Why has the Eurozone ended up with an unemployment rate more than twice that of the United States more than six years after the collapse of Lehman Brothers? Why did the vast

majority of low- and middle-income countries suffer a prolonged economic slowdown in the last two decades of the 20th century? What was the role of the International Monetary Fund in these economic failures? Why was Latin America able to achieve substantial poverty reduction in the 21st century after more than two decades without any progress? Failed analyzes these questions, explaining why these important economic developments of recent years have been widely misunderstood and in some cases almost completely ignored. First, in the Eurozone, Mark Weisbrot argues that the European authorities' political agenda, which included shrinking the welfare state, reducing health care, pension, and other social spending, and reducing the bargaining power of labor played a very important role in prolonging the Eurozone's financial crisis and pushing it into

years of recession and mass unemployment. This conclusion is based not only on public statements of European officials, but also on thousands of pages of documentation from consultations between the IMF and European governments after 2008. The second central theme of *Failed* is that there are always practical alternatives to prolonged economic failure. Drawing on the history of other financial crises, recessions, and recoveries, Weisbrot argues that regardless of initial conditions, there have been and remain economically feasible choices for governments of the Eurozone to greatly reduce unemployment—including the hardest hit, crisis-ridden country of Greece. The long-term economic failure of developing countries, its social consequences, as well as the subsequent recovery in the first decade of the 21st century, constitute the third part of the book's

narrative, one that has previously gotten too little attention. We see why the International Monetary Fund has lost influence in middle income countries. *Failed* also examines the economic causes and consequences of Latin America's "second independence" and rebound in the twenty-first century, as well as the challenges that lie ahead.

Mercenaries explores the secretive relationships between states and hackers. As cyberspace has emerged as the new frontier for geopolitics, states have become entrepreneurial in their sponsorship, deployment, and exploitation of hackers as proxies to project power. Such modern-day mercenaries and privateers can impose significant harm undermining global security, stability, and human rights. These state-hacker relationships therefore raise important questions about the control, authority, and use of offensive cyber capabilities. While different countries pursue different models for their proxy relationships, they face the common challenge of balancing the benefits of these relationships with their costs and the potential risks of escalation. This book examines case studies in the United States, Iran, Syria, Russia, and China for the purpose of establishing

a framework to better understand and manage the impact and risks of cyber proxies on global politics. *Psychological Components of Sustainable Peace* Peter T. Coleman 2012-06-15 Scholarship on the psychology of peace has been accumulating for decades. The approach employed has been predominantly centered on addressing and preventing conflict and violence and less on the conditions associated with promoting peace. Concerns around nuclear annihilation, enemy images, discrimination, denial of basic human needs, terrorism and torture have been the focal points of most research. The Psychological Components of a Sustainable Peace moves beyond a prevention-orientation to the study of the conditions for increasing the probabilities for sustainable, cooperative peace. promotive-orientation to the study of peaceful situations and societies. The contributors to this volume examine the components of various psychological theories that contribute to the promotion of a harmonious, sustainable peace. Underlying this orientation is the belief that promoting the ideas and actions which can lead to a sustainable, harmonious peace will not only contribute to the prevention of war, but will also lead to more positive, constructive relations among people and nations and to a more sustainable planet. The Psychological Components of a Sustainable Peace is valuable and stimulating reading for researchers in peace psychology, political psychology, and conflict resolution as well as others who are interested in developing a sustainable, harmonious world.

Formal Methods for Computational Systems Biology Marco Bernardo

2008-05-20 This book presents a set of 14 papers accompanying the lectures of leading researchers given at the 8th edition of the International School on Formal Methods for the Design of Computer, Communication and Software Systems, SFM 2008, held in Bertinoro, Italy in June 2008. SFM 2008 was devoted to formal techniques for computational systems biology and covered several aspects of the field, including computational models, calculi and logics for biological systems, and verification and simulation methods. The first part of this volume comprises nine papers based on regular lectures, the second part of this volume comprises five papers based on talks given by people involved in the Italian BISCA research project on Bio-Inspired Systems and Calculi with Applications.

**Pleasure** Susie Jolly  
2013-06-13 This pioneering collection explores the ways in which positive, pleasure-focused approaches to sexuality can empower women. Gender and development has tended to engage with sexuality only in relation to violence and ill-health. Although this has been hugely important in challenging violence against women, over-emphasizing these negative aspects has dovetailed with conservative ideologies that associate women's sexualities with danger and fear. On the other hand, the media, the pharmaceutical industry, and pornography more broadly celebrate the pleasures of sex in ways that can be just as oppressive, often implying that only certain types of people - young, heterosexual, able-bodied, HIV-negative - are eligible for sexual pleasure. *Women, Sexuality and the Political Power of Pleasure* brings together challenges to these

strictures and exclusions from both the South and North of the globe, with examples of activism, advocacy and programming which use pleasure as an entry point. It shows how positive approaches to pleasure and sexuality can enhance equality and empowerment for all.

foundational and theoretical topics to programs and systems issues and to applications, comprising formal methods, software and systems modeling, semantics, laws of programming, specification and verification, as well as logics. He Jifeng is known for his seminal work in the theories of programming and formal methods for software engineering. He is particularly associated with Unifying Theories of Programming (UTP), the theory of data refinement and the laws of programming, and the rCOS formal method for object and component system construction. His book on UTP with Tony Hoare has been widely read and followed by a large number of researchers, and it has been used in many postgraduate courses. He was a senior researcher at Oxford during 1984-1998, and then a senior research fellow at the United Nations University International

Institute for Software Technology (UNU-IIST) in Macau during 1998-2005. He has been a professor and currently the Dean of the Institute of Software Engineering at East China Normal University, Shanghai, China. In 2005, He Jifeng was elected as an academican to the Chinese Academy of Sciences. He also received an honorary doctorate from the University of York. He won a number of prestigious science and technology awards, including a 2nd prize of Natural Science Award from the State Council of China, a 1st prize of Natural Science Award from the Ministry of Education of China, a 1st prize of Technology Innovation from the Ministry of Electronic Industry, and a number awards from Shanghai government.

Union as the key building blocks of a united Africa are examined - these are the Common Market for Eastern and Southern Africa (COMESA), the East African Community (EAC) and the Southern African Development Community (SADC). These RECS include Africa's major economies - Egypt, South Africa, and Kenya but are also home to Africa's most conflict prone and volatile states - the Democratic Republic of the Congo (DRC), Burundi, South Sudan, Somalia and Lesotho. Providing a detailed overview of the current relationship between these power blocs, this book provides insight into the current state of diplomatic and economic relations within Africa and shows how far there is to go for a future of Pan-Africanism.

Civic Engagement in Food System Governance Alan R. Hunt 2015-10-05 The local food movement is one of the most active of current civil engagement social

movements. This work presents primary evidence from over 900 documents, interviews, and participant observations, and provides the first descriptive history of local food movement national policy achievements in the US, from 1976 to 2013, and in the UK, from 1991 to 2013, together with reviews of both the American and British local food movements. It provides a US-UK comparative context, significantly updating earlier comparisons of American, British and European farm and rural policies. The comparative perspective shows that, over time, more effective strategies for national policy change required social-movement building strategies, such as collaborative policy coalitions, capacity-building for smaller organizations, and policy entrepreneurship for joining together separate rural, farming, food, and health interests. In contrast, narrowly-defined single

issue campaigns often undermined long-term policy change, even if short-term wins emerged. By profiling interviews of American and English movement leaders, policymakers, and funders, the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences.

### **Commodity Prices and Inflation Expectations in the United States**

Oya Celasun 2012-03-01 U.S. monetary policy can remain extraordinarily accommodative only if longer-term inflation expectations stay well-anchored, including in response to commodity price shocks. We find that oil price shocks have a statistically significant, but economically small impact on longer-term inflation compensation embedded in U.S. Treasury bonds. The estimated effect is larger for the post-crisis period, and robust to controlling for

measures of liquidity risk premia. Oil price shocks are also correlated with the variance of longer-term inflation expectations in the University of Michigan Survey of Consumers in the post-crisis period. These results are not attributable to looser monetary policy - oil price increases were associated with expectations of a faster monetary tightening after the crisis. Overall, the findings are consistent with some impact of commodity prices on long-term inflation expectations and/or on inflation rate risk.

framework for nuclear governance in the Asia-Pacific – encompassing nuclear safety, security, and safeguards/non-proliferation. Nuclear governance collaboration offers an avenue for states in the Asia-Pacific to tackle the emerging opportunities for and challenges to the peaceful uses of nuclear energy and the civilian applications of nuclear and radioactive materials. The nature of national actions, bilateral initiatives and regional cooperation in capacity building taking place in East Asia provides a good foundation to pursue a more robust collaborative framework for nuclear governance in the wider Asia-Pacific region. The contributors to this book explore the most critical nuclear safety, security and non-proliferation issues faced by states in the Asia-Pacific and the growing cooperation spearheaded by Southeast Asian countries, China, Japan, South Korea

and the United States. This book is a valuable read for academics working on security and strategic studies, international relations, non-traditional security issues as well as nuclear-related issues.

### Education in a Multicultural Cyprus

Nicos Anastasiou 2017-08-21 Greek Cypriots, Turkish Cypriots, Maronites, Latins, and Armenians have been the primary historical communities that make up the multicultural landscape of Cyprus. However, the continuing conflict between the Greek and Turkish Cypriots has geographically, socially and psychologically segregated these communities, while the influx of economic migrants, especially after Cyprus's accession to the EU in 2004, has, in turn, contributed to

Cyprus's challenges, arising from multiculturalism, in an altogether different perspective. How has education, over time, addressed and re-examined all these issues introduced by Cyprus' complex evolving multiculturalism and ethnic diversity? How can education better attend to current problems of coexistence in Cyprus, and what kind of role can it play in a federal re-united country? This collection of essays introduces an innovative and critical examination of these questions in order to provide relevant answers. More specifically, it examines how formal, non-formal and informal education contributed to the creation and perpetuation of the Cyprus conflict, as well as to prejudices, inter-ethnic stereotypes, and misperceptions. The book also discusses how education could contribute to conflict transformation, empathy and peaceful

coexistence amongst the different Cypriot communities, and how this has been possible in other multi-ethnic societies. The volume will be of interest to students, practitioners, and researchers interested in peace education, multiculturalism and conflict transformation.

**Hague Yearbook of International Law / Annuaire de La Haye de Droit International, Vol. 25 (2012)** Nikolaos

Lavranos 2013-11-07 The title of the Edited by Hague Yearbook of International Law Edited by reflects the close ties which have always existed between the AAA and the City of The Hague with its international law institutions, and indicates the Yearbook's aim of devoting attention to developments taking place in the international law institutions based in The Hague. However, the Yearbook has a broader scope as well: to offer a platform for review of new

developments in the field of international law. As of the 2010 Volume, the Yearbook will be compiled by a new and expanded Editorial Board, offering fresh ideas and a new approach. A newly established Advisory Board has also been added, including ICJ Judge Bruno Simma, Serge Brammertz, Prosecutor of the International Criminal Tribunal for the Former Yugoslavia (ICTY), Jacomijn J. van Haersolte-van Hof, advocate (advocaat) at HaersolteHof and arbitrator (The Netherlands) and Professor Peter Hilpold, Innsbruck University (Austria). Sections have been created on public international law, private international law, international investment law and international criminal law, containing in-depth articles on current issues. The breadth of the Yearbook's content thus offers an interesting and valuable illustration of the dynamic developments in

the various sub-areas of international law.

## **Island Tourism**

## **Sustainability and Resiliency** Michelle McLeod

2022-04-28 This book provides comprehensive insight into the challenges faced by island tourism destinations and theoretical and practical paths for built in sustainability and resiliency. It explores Island Tourism Resilience within the context of 'Lifecycles, System Decline and Resilience'. Tourism is a key activity for many islands, and some depend on the tourism sector as a main economic activity. An exploration of islands across the globe that addresses substantial matters of ongoing sustainability and resiliency is ever important. An array of challenges including natural disasters, climate change, economic and political crises among others has been addressed in the book, with additional areas such as overtourism and COVID-19 included at the conclusion. This volume is essential reading for academics, tourism planners
