Digital Critical Editions Daniel Apollon 2014-07-15 Provocative yet sober, Digital Critical Editions examines how transitioning from print to a digital milieu deeply affects how scholars deal with the work of editing critical texts. On one hand, forces like changing technology and evolving reader expectations lead to the development of specific editorial products, while on the other hand, they threaten traditional forms of knowledge and methods of textual scholarship. Using the experiences of philologists, text critics, text encoders, scientific editors, and media analysts, Digital Critical Editions ranges from philology in ancient Alexandria to the vision of user-supported online critical editing, from peer-directed texts distributed to a few to community-edited products shaped by the many. The authors discuss the production and accessibility of documents, the emergence of tools used in scholarly work, new editing regimes, and how the readers' expectations evolve as they navigate digital texts. The goal: exploring questions such as, What kind of text is produced? Why is it produced in this particular way? Digital Critical Editions provides digital editors, researchers, readers, and technological actors with insights for addressing disruptions that arise from the clash of traditional and digital cultures, while also offering a practical roadmap for processing traditional texts and collections with today's state-of-the-art editing and research techniques thus addressing readers' new emerging reading habits.

Education from a Whiteheadian Point of View Vesselin Petrov 2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher, and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories, while avoiding their disadvantages. Toward these ends, one excellent candidate for consideration is Alfred North Whitehead's (1861-1947) process-relational philosophy of education, as set forth in *The Aims of Education* (1929) and elsewhere. The contributors to this volume analyze Whitehead's philosophy of education in a detailed and critical fashion, including inquiring into the development of cycle-based approaches to education, like Whitehead's, in intellectual history as well as its potential objective bases. They also demonstrate how this relates to, and can be integrated with, other leading theories of education and contemporary pedagogical thinking, and identify avenues for its positive, practical application in schooling across the globe as well as in scientific research. The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles, while also exploring the ramifications of its selection and application in education for society in general, as well as for our common civilizational aspirations, including humanity's addressing of global problems, such as the ecological crisis. In addition, the volume also serves to lay some of the groundwork for its potential further development.

Perturbation, Behavioural Feedbacks, and Population Dynamics in Social Animals Daniel Oro 2020-03-26 This novel, transdisciplinary work explains how perturbations (defined as strong disturbances or deviations to a system) can affect the population dynamics of social animals, including ourselves. Social responses to perturbations, especially dispersal processes, can also generate non-linear population dynamics, including the potential appearance of tipping points and critical population transitions, which can in turn lead to catastrophic shifts and collapses. The book describes the links between social behaviour (mainly the use of social information and social copying), and non-linear population dynamics at different

spatial scales (local dynamics and meta-population dynamics), and their ecological and evolutionary consequences. Examples from the natural world illustrate each of the main themes (prospecting, habitat suitability, collective dispersal, and cultural evolution). Human warfare and conflict, referred to in several chapters together with quantitative and qualitative examples, is also viewed as a form of perturbation and represents a paradigmatic example of the rationale behind this book. This applicability to our own species is particularly timely, given increased interest in both ecosystem change, human migration, and the global refugee crisis. Perturbation, Behavioural Feedbacks, and Population Dynamics in Social Animals will appeal to applied, theoretical, and evolutionary ecologists, particularly those working on the population and behavioural ecology of any social animal including humans. Its overlap with the study of complexity will also ensure its relevance and use to scientists from other disciplines such as sociology, anthropology, physics, computational science, economics, and mathematics.

The Shias of Pakistan Andreas Rieck 2016-01-15 The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia-Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class,

of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.

Linking Adults with Community: Promoting Civic Engagement Through Community Based Learning

Susan C. Reed 2008-07-15 Employing community-based learning with adults presents unique challenges and opportunities; it requires an analysis of the adult-learning literature as well as identification of service-learning practices that will be effective with adults. In this volume, drawing upon adult-learning and service-learning literature and case studies, scholars and practitioners articulate best practices in community-based adult learning and illustrate its implementation. Adults are increasingly called upon to become involved in the body politic Strengthening their communities promoting change enlivening our democracy Competing with the call for civic engagement are the demanding priorities of modern life that adults face in the workplace, at home, and in their community. In community-based learning, universities partner with local organizations and nonprofits to provide experiences that promote the growth and development of both students and community residents. Careful project design is crucial to the accomplishment of these laudable outcomes. This volume provides a valuable guide to service-learning professionals meeting these challenges. This is the 118th volume in the Jossey-Bass quarterly report series New Directions for Adult and Continuing Education, an indispensable series that explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

Two Basic Points in Georgian-German Relations George Meskhi 2012-05-31 Master's Thesis from the year 2011 in the subject Politics - International Politics - Topic: History of International Relations, grade: 96, , course: International Relations - European Studies, language: English, abstract: The relations between Georgia and Germany refer to the actual and progressively ongoing process. These relations have quite significant tradition in the last century. According to the official information "close and trustful relations between Germany and Georgia have the tradition of nearly 200 years". Therefore the experience earned through the different historical points of German-Georgian relations can be used from nowadays as well as from the future perspective. Accordingly, the analyze of the important points in these relations and explaining certain circumstances of them should be worth of interest. Therefore the aim of our research is to clarify the certain points in the history of Georgian-German relations with the proper theoretical framework. Our research is dedicated to the two basic points of the history of German-Georgian relations. The first point is the relations connected to the declaration of independence by Georgia in 26 May 1918. The second one refers to the restoration of independence in 9 April 1991 based on the independence act of 26 May. These two dates had been the crucial points in the history of Georgia of the previous century. However, they had been the basic turning points in the history of German-Georgian relations as well. In the first case the basic motivation for starting the relations between Georgia and Germany was the issue of Georgian independence. In the second case the relations between Germany and Georgia has started after (but not immediately after) the declaration of independence as well. However, there is a significant difference between these two periods of Georgian-German relations. First of all, the symmetry of developing relations goes differently. In the first case the relations had started several years before the declaration of independence, which was the direct result of these relations, and finished shortly (several months) after declaring independence. In the second case the relations have started some time after the restoration of independence, the relations which still go on during the last couple of decades. Another difference, which has the basic importance for our

research, is the fundamentally different attitude from the German side towards the first and second cases of declaring independence of Georgia. The research tries to clarify the reasons for such difference and explain it with the proper theoretical concept.

Wikipedia and the Representation of Reality Zachary J. McDowell 2021-08-30 A contemporary examination of what information is represented, how that information is presented, and who gets to participate (and serve as gatekeeper) in the world's largest online repository for information, Wikipedia. Bridging contemporary education research that addresses the 'experiential epistemology' of learning to use Wikipedia with an understanding of how the inception and design of the platform assists this, the book explores the complex disconnect between the encyclopedia's formalized policy and the often unspoken norms that govern its knowledge-making processes. At times both laudatory and critical, this book illustrates Wikipedia's struggle to combat systemic biases and lack of representation of marginalized topics as it becomes the standard bearer for equitable and accessible representation of reality in an age of digital disinformation and fake news. Being an important and timely contribution to the field of media and communication studies, this book will appeal to academics and researchers interested in digital disinformation, information literacy, and representation on the Internet, as well as students studying these topics.

Creating a Tipping Point: Strategic Human Resources in Higher Education Alvin Evans 2012-04-27 In a turbulent, unstable era of severe financial pressures, the development of strategic human resource (HR) practices has become an urgent mandate in higher education. With significant and widespread institutional shifts resulting from globalization, heightened competition, and rapid innovation, educational leaders must optimize their most significant resource—human capital—and align HR strategies, structures, and processes with organizational goals. Due to substantial cuts in state appropriations and rapidly diminishing budgets, public institutions of higher education in particular are struggling to realign resources and programs to fulfill their educational missions and maintain academic quality, while simultaneously responding to complex external legislative and accreditation mandates. In light of these challenges, *Creating a Tipping Point: Strategic Human Resources in Higher Education* breaks new ground by presenting a research-based approach that supports the evolution of HR practices from siloed, transactional models to strategic operations that serve the entire university. This monograph provides a concrete, progressive road map to developing organizational capabilities in support of the university's academic mission and illustrates this pathway with examples drawn from public research universities. It offers strategies, tools, metrics, and action steps that support the development of an effective and efficient strategic HR operation in higher education. For institutions seeking to implement strategic HR, this book is a practical and invaluable resource.

In *Found in Transition*, Yiu-Wai Chu examines the fate of Hong Kong's unique cultural identity in the contexts of both global capitalism and the increasing influence of China. Drawing on recent developments, especially with respect to language, movies, and popular songs as modes of resistance to "Mainlandization" and different forms of censorship, Chu explores the challenges facing Hong Kong twenty years after its reversion to China as a Special Administrative Region. Highlighting locality and hybridity along postcolonial lines of interpretation, he also attempts to imagine the future of Hong Kong by utilizing Hong Kong studies as a method. Chu argues that the study of Hong Kong—the place where the impact of the rise of China is most intensely felt—can shed light on emergent crises in different areas of the world. As such, this book represents a consequential follow-up to the author's *Lost in Transition* and a valuable contribution to international, area, and cultural studies. "This is a wide-ranging and worthy sequel to Chu's *Lost in Transition*. By juxtaposing a series of critical issues—urban development, self-writing, language education, and cultural production, among others—that have confounded those who care deeply about this former British colony, Chu offers his readers an intelligent and sensitive guide to connect and make sense of the various debates, and he places the conundrums Hong Kong faces in the contexts of both the limits of neoliberal capitalism and the 'Age of China.'" — Leo K. Shin, author of *The Making of the Chinese State: Ethnicity and Expansion on the Ming Borderlands*

Connection Point Lee Ferry 2009-10-29 Connection point is a folklore that tells about who the Nig!r is and where the people known by that name came from. How important is a name to a people? A name is a very powerful vehicle that identifies the people or their tribes. It gives us a history of the people. In essence, we come to understand the nature of the people better; even more, we gain information from each other to make behavior adjustment in the differences we have with each other. The Author takes the folklore he received growing up close to his grandfather and developed it into this book. Lee Ferry took the "N" word to pieces and rendered the word to the departure point of the people, a Niger River Kingdom. Then, in his research appeared the Jewish prince-priest from Yemen, with a Saint George and the Dragon type mission to bring the Songo (River Nig!rs) back to Judaism. Lee examines the Songo folklore, which seems to coincide with our folklore; they came from Egypt where an island in the Nile had an Israelite Temple on it around the time the Temple was destroyed. The people were Ethiopians. Then the struggle for right or might is on. The story is lively with a bold approach to a subject no one is willing to talk about; yet at the time, it is a fact that this subject needs to be cleaned up once and for all.

For Humanity Or For The Umma? Marie Juul Petersen 2016-01-15 In the wake of 9/11 and the 'War on Terror', transnational Muslim NGOs have too often been perceived as illegitimate fronts for global militant networks such as al-Qaeda or as backers of national political parties and resistance groups in Palestine, Afghanistan and elsewhere. Yet clearly there is more to transnational Muslim NGOs. Most are legitimate providers of aid to the world's poor, although their assistance may sometimes differ substantially from that of secular NGOs in the West. Seeking to broaden our understanding of these organisations, Marie Juul Petersen explores how Muslim NGOs conceptualise their provision of aid and the role Islam plays in this. Her book not only offers insights into a new kind of NGO in the global field of aid provision; it also contributes more broadly to understanding 'public Islam' as something more and other than political Islam. The book is based on empirical case studies of four of the biggest transnational Muslim NGOs, and draws on extensive research in Britain, Kuwait, Saudi Arabia, Lebanon, Jordan and Bangladesh, and more than 100 interviews with those involved in such organisations.

From a Rational Point of View Tim Henning 2018-05-11 When discussing normative reasons, oughts, requirements of rationality, motivating reasons, and so on, we often have to use verbs like "believe" and "want" to capture a relevant subject's perspective. According to the received view about sentences involving these verbs, what they do is describe the subject's mental states. Many puzzles concerning normative discourse have to do with the role that mental states consequently appear to play in normative discourse. Tim Henning uses tools from semantics and the philosophy of language to develop an alternative account of sentences involving these verbs. According to this view, which is called parentheticalism, we very commonly use these verbs in a parenthetical sense. These verbs themselves express backgrounded side-remarks on

the contents they embed, and these latter, embedded contents constitute the at-issue contents. This means that instead of speaking about the subject's mental states, we often use sentences involving "believe" and "want" to speak about the world from her point of view. Henning makes this notion precise, and uses it to solve various puzzles concerning normative discourse. The final result is a new, unified understanding of normative discourse, which gets by without postulating conceptual breaks between objective and subjective normative reasons, or normative reasons and rationality, or indeed between the reasons we ascribe to an agent and the reasons she herself can be expected to cite. Instead of being connected to either subjective mental states or objective facts, all of these normative statuses are can be adequately articulated by citing worldly considerations from a subject's point of view.

Return to Point Zero Murat Somer 2022-07-01 How did the Kurdish-Turkish Conflict arise? Why have Turks and Kurds failed for so long to solve it? How can they solve it today? How can social scientists better analyze this and other protracted conflicts and propose better prescriptions for sustainable peace? Return to Point Zero develops a novel framework for analyzing the historical-structural and contemporary causes of ethnic-national conflicts, highlighting an understudied dimension: politics. Murat Somer argues that intra-majority group politics rather than majority-minority differences better explains ethnic-national conflicts. Hence, the political-ideological divisions among Turks are the key to understanding the Turkish-Kurdish Conflict; though it was nationalism that produced the Kurdish Question during late-Ottoman imperial modernization, political elite decisions by the Turks created the Kurdish Conflict during the post-imperial nation-state building. Today, ideational rigidities reinforce the conflict. Analyzing this conflict from "pre-modern" times to today,

Somer emphasizes two distinct periods: the formative era of 1918–1926 and the post-2011 reformative period. Somer argues that during the formative era, political elites inadequately addressed three fundamental dilemmas of security, identity, and cooperation and includes a discussion of how the legacy of those political elite decisions impacted and framed peace attempts that have failed in the 1990s and 2010s. Return to Point Zero develops new concepts to analyze conflicts and concrete conflict-resolution proposals.

Point of View 2-Book Bundle Brent Rathgeber 2014-09-25 This special 2-book bundle contains two cutting edge pieces of political analysis. Irresponsible Government examines the current state of Canadian

democracy in contrast to the founding principles of responsible government established by the Fathers of Confederation. The book examines the failure of modern elected representatives to perform their constitutionally mandated duty to hold the prime minister and his cabinet to account. It further examines the modern lack of separation between the executive and legislative branches of government and the disregard with which the executive views Parliament. The book seeks to shine light on the current power imbalances that have developed in Canadian government. There are few greater tragedies than a war waged by a society against itself. As Time Bomb shows, a catastrophic confrontation between Canada's so-called "settler" and First Nations communities is not only feasible, it is, in theory, inevitable. Grievances, prejudice, and other factors all combine to make the likelihood of a First Nations uprising very real. This book describes how a nationwide insurgency could unfold, how the "usual" police and military reactions to First Nations protests would only worsen such a situation, and how, on the other hand, innovative policies might defuse the smouldering time bomb in our midst. The question all Canadians and First Nations must answer is this: Must we all suffer the disaster of a great national insurgency or will we act together to extinguish the growing danger in our midst? Includes Irresponsible Government Time Bomb
