**Creating a Tipping Point: Strategic Human Resources in Higher Education** Alvin Evans 2012-04-27 In a turbulent, unstable era of severe financial pressures, thedevelopment of strategic human resource (HR) practices has becomean urgent mandate in higher education. With significant andwidespread institutional shifts resulting from globalization,heightened competition, and rapid innovation, educational leadersmust optimize their most significant resource—humancapital—and align HR strategies, structures, and processeswith organizational goals. Due to substantial cuts in stateappropriations and rapidly diminishing budgets, public institutionsof higher education in particular are struggling to realignresources and programs to fulfill their educational missions andmaintain academic quality, while simultaneously responding tocomplex external legislative and accreditation mandates. In light of these challenges, Creating a Tipping Point:Strategic Human Resources in Higher Education breaks new groundby presenting a research-based approach that supports the evolutionof HR practices from siloed, transactional models to strategicoperations that serve the entire university. This monographprovides a concrete, progressive road map to developingorganizational capabilities in support of the university's academicismission and illustrates this pathway with examples drawn frompublic research universities. It offers strategies, tools, metrics,and action steps that support the development of an effective andefficient strategic HR operation in higher education. Forinstitutions seeking to implement strategic HR, this book is impractical and invaluable resource.

**Wikipedia and the Representation of Reality** Zachary J. McDowell 2021-08-30 A contemporary examination of what information is represented, how that information is presented, and who gets to participate (and serve as gatekeeper) in the world's largest online repository for information, Wikipedia. Bridging contemporary education research that addresses the 'experiential epistemology' of learning to use Wikipedia with an understanding of how the inception and design of the platform assists this, the book explores the complex disconnect between the encyclopedia's formalized policy and the often unspoken norms that govern its knowledge-making processes. At times both laudatory and critical, this book illustrates Wikipedia's struggle to combat systemic biases and lack of representation of marginalized topics as it becomes the standard bearer for equitable and accessible representation of reality in an age of digital disinformation and fake news. Being an important and timely contribution to the field of media and communication studies, this book will appeal to academics and researchers interested in digital disinformation, information literacy, and representation on the Internet, as well as students studying these topics.

**Two Basic Points in Georgian-German Relations** George Meskhi 2012-05-31 Master's Thesis from the year 2011 in the subject Politics - International Politics - Topic: History of Inernational Relations, grade: 96 , course: International Relations - European Studies, language: English, abstract: The relations between Georgia and Germany refer to the actual and progressively ongoing process. These relations have quite significant tradition in the last century. According to the official information "close and trustful relations between Germany and Georgia have the tradition of nearly 200 years". Therefore the experience earned through the different historical points of German-Georgian relations can be used from nowadays as well as from the future perspective. Accordingly, the analyze of the important points in these relations and explaining certain circumstances of them should be worth of interest. Therefore the aim of our research is to clarify the certain points in the history of Georgian-German relations with the proper theoretical framework. Our research is dedicated to the two basic points of the history of German-Georgian relations. The first point is the relations connected to the declaration of independence by Georgia in 26 May 1918. The second one refers to the restoration of independence in 9 April 1991 based on the independence act of 26 May. These two dates had been the crucial points in the history of Georgia of the previous century. However, they had been the basic turning points in the history of German-Georgian relations as well. In the first case the basic motivation for starting the relations between Georgia and Germany was the issue of Georgian independence. In the second case the relations between Germany and Georgia has started after (but not immediately after) the declaration of independence as well. However, there is a significant difference between these two periods of Georgian-German relations. First of all, the symmetry of developing relations goes differently. In the first case the relations had started several years before the declaration of independence, which was the direct result of these relations, and finished shortly (several months) after declaring independence. In the second case the relations have started some time after the restoration of independence, the relations which still go on during the last couple of decades. Another difference, which has the basic importance for our research, is the fundamentally different attitude from the German side towards the first and second cases of declaring independence of Georgia. The research tries to clarify the reasons for such difference and explain it with the proper theoretical concept.

**Found in Transition** Yiu-Wai Chu 2018-10-16 Presents an updated account of Hong Kong and its culture two decades after its reversion to China. In *Found in Transition*, Yiu-Wai Chu examines the fate of Hong Kong’s unique cultural identity in the contexts of both global capitalism and the increasing influence of China. Drawing on recent developments, especially with respect to language, movies, and popular songs as modes of resistance to “Mainlandization” and different forms of censorship, Chu explores the challenges facing Hong Kong twenty years after its reversion to China as a Special Administrative Region. Highlighting locality and hybridity along postcolonial lines of interpretation, he also attempts to imagine the future of Hong Kong by utilizing Hong Kong studies as a method. Chu argues that the study of Hong Kong—the place where the impact of the rise of China is most intensely felt—can shed light on emergent crises in different areas of the world. As such, this book represents a consequential follow-up to the author’s *Lost in Transition* and a valuable contribution to international, area, and cultural studies. “This is a wide-ranging and worthy sequel to Chu’s *Lost in Transition*. By juxtaposing a series of critical issues—urban development, self-writing, language education, and cultural production, among others—that have confounded those who care deeply about this former British colony, Chu offers his readers an intelligent and sensitive guide to connect and make sense of the various debates, and he places the conundrums Hong Kong faces in the contexts of both the limits of neoliberal capitalism and the ‘Age of China.’” — Leo K. Shin, author of *The Making of the Chinese State: Ethnicity and Expansion on the Ming Borderlands*

*Perturbation, Behavioural Feedbacks, and Population Dynamics in Social Animals* Daniel Oro 2020-03-26 This novel, transdisciplinary work explains how perturbations (defined as strong disturbances or deviations to a system) can affect the population dynamics of social animals, including ourselves. Social responses to perturbations, especially dispersal processes, can also generate non-linear population dynamics, including the potential appearance of tipping points and critical population transitions, which can in turn lead to catastrophic shifts and collapses. The book describes the links between social behaviour (mainly the use of social information and social copying), and non-linear population dynamics at different spatial scales (local dynamics and meta-population dynamics), and their ecological and evolutionary consequences. Examples from the natural world illustrate each of the main themes (prospecting, habitat suitability, collective dispersal, and cultural evolution). Human warfare and conflict, referred to in several chapters together with quantitative and qualitative examples, is also viewed as a form of perturbation and represents a paradigmatic example of the rationale behind this book. This applicability to our own species is particularly timely, given increased interest in both ecosystem change, human migration, and the global refugee crisis. *Perturbation, Behavioural Feedbacks, and Population Dynamics in Social Animals* will appeal to applied, theoretical, and evolutionary ecologists, particularly those working on the population and behavioural ecology of any social animal including humans. Its overlap with the study of complexity will also ensure its relevance and use to scientists from other disciplines such as sociology, anthropology, physics, computational science, economics, and mathematics.

**Linking Adults with Community: Promoting Civic Engagement Through Community Based Learning** Susan C. Reed 2008-07-15 Employing community-based learning with adults presents unique challenges and opportunities; it requires an analysis of the adult-learning literature as well as identification of service-learning practices that will be effective with adults. In this volume, drawing upon adult-learning and service-learning literature and case studies, scholars and practitioners articulate best practices in community-based adult learning and illustrate its implementation. Adults are increasingly called upon to become involved in the body politic Strengthening their communities promoting change enlivening our democracy Competing with the call for civic engagement are the demanding priorities of modern life that adults face in the workplace, at home, and in their community. In community-based learning, universities partner with local organizations and nonprofits to provide experiences that promote the growth and development of both students and community residents. Careful project design is crucial to the accomplishment of these laudable outcomes. This volume provides a valuable guide to service-learning professionals meeting these challenges. This is the 118th volume in the Jossey-Bass quarterly report series *New Directions for Adult and Continuing Education*, an indispensable series that explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

**Digital Critical Editions** Daniel Apollon 2014-07-15 Provocative yet sober, Digital Critical Editions examines how transitioning from print to a digital milieu deeply affects how scholars deal with the work of editing critical texts.

On one hand, forces like changing technology and evolving reader expectations lead to the development of specific editorial products, while on the other hand, they threaten traditional forms of knowledge and methods of textual scholarship. Using the experiences of philologists, text critics, text encoders, scientific editors, and media analysts, Digital Critical Editions ranges from philology in ancient Alexandria to the vision of user-supported online critical editing, from peer-directed texts distributed to a few to community-edited products shaped by the many. The authors discuss the production and accessibility of documents, the emergence of tools used in scholarly work, new editing regimes, and how the readers' expectations evolve as they navigate digital texts. The goal: exploring questions such as, What kind of text is produced? Why is it produced in this particular way? Digital Critical Editions provides digital editors, researchers, readers, and technological actors with insights for addressing disruptions that arise from the clash of traditional and digital cultures, while also offering a practical roadmap for processing traditional texts and collections with today's state-of-the-art editing and research techniques thus addressing readers' new emerging reading habits.

**For Humanity Or For The Umma?** Marie Juul Petersen 2016-01-15 In the wake of 9/11 and the 'War on Terror', transnational Muslim NGOs have too often been perceived as illegitimate fronts for global militant networks such as al-Qaeda or as backers of national political parties and resistance groups in Palestine, Afghanistan and elsewhere. Yet clearly there is more to transnational Muslim NGOs. Most are legitimate providers of aid to the world's poor, although their assistance may sometimes differ substantially from that of secular NGOs in the West. Seeking to broaden our understanding of these organisations, Marie Juul Petersen explores how Muslim NGOs conceptualise their provision of aid and the role Islam plays in this. Her book not only offers insights into a new kind of NGO in the global field of aid provision; it also contributes more broadly to understanding 'public Islam' as something more and other than political Islam. The book is based on empirical case studies of four of the biggest transnational Muslim NGOs, and draws on extensive research in Britain, Kuwait, Saudi Arabia, Lebanon, Jordan and Bangladesh, and more than 100 interviews with those involved in such organisations.

*Fixed Point Theory, Variational Analysis, and Optimization* Saleh Abdullah R. Al-Mezel 2014-06-03 Fixed Point Theory, Variational Analysis, and Optimization not only covers three vital branches of nonlinear analysis—fixed point theory, variational inequalities, and vector optimization—but also explains the connections between them, enabling the study of a general form of variational inequality problems related to the optimality conditions involving differentiable or directionally differentiable functions. This essential reference supplies both an introduction to the field and a guideline to the literature, progressing from basic concepts to the latest developments.

Packed with detailed proofs and bibliographies for further reading, the text: Examines Mann-type iterations for nonlinear mappings on some classes of a metric space Outlines recent research in fixed point theory in modular function spaces Discusses key results on the existence of continuous approximations and selections for set-valued maps with an emphasis on the nonconvex case Contains definitions, properties, and characterizations of convex, quasiconvex, and pseudoconvex functions, and of their strict counterparts Discusses variational inequalities and variational-like inequalities and their applications Gives an introduction to multi-objective optimization and

optimality conditions Explores multi-objective combinatorial optimization (MOCO) problems, or integer programs with multiple objectives Fixed Point Theory, Variational Analysis, and Optimization is a beneficial resource for the research and study of nonlinear analysis, optimization theory, variational inequalities, and mathematical economics. It provides fundamental knowledge of directional derivatives and monotonicity required in understanding and solving variational inequality problems.

**The Shias of Pakistan** Andreas Rieck 2016-01-15 The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia- Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.
